

Schneidmaster 20 / 85

Schneidmaster 20/85 (30/85) is a cutting machine for cables, strands and hoses with a diameter up to 25 mm (30 mm) or 85 mm width.

The cutting System is supplied with material by means of driving belt with an adjustable speed up to 60 m/min.

The driving trust is regulated by a pneumatic cylinder.

Thus differences in the cutting-material are automatically equalized.

The pneumatic opening of the driving device ensures an easy feed of cutting- material.

Due to the compact and mobile construction, the SM 20/85 has a flexible application.

Two decade switches make it possible to set the length and quantity.

The machine will stop, when required quantity is reached, or when cutting-material runs out.

optional functions:

cycling working of different lengths bundle counter, interface for data transfer

further functions on inquiry

Special versions of Schneidmaster 20/85:

- for cutting of Steel-wire
- for thermo cutting
- for hoses
- for plastic-tubes

technical Data:

opening of material feed	25 mm diam.(30 mm) max.
cutting length	1-99.999 mm
quantity	1-99.999 mm
speed of transport	60 m/min (100 m) max.
noise when operating	65 dB (A)
mains connection	230 V, 50 Hz
air connection	6 bar
width	500 mm
length	760 mm
height	620 mm
weight	95 kg
